

CHLA-ABSC Conference 2022: Let's try this again... / Essayons encore une fois...

Friday, Jun 10

02:00 PM - 06:30 PM

Registration

Friday, Jun 10: Sheraton Fallsview - Fallsview Studio ABC

05:00 PM - 06:30 PM

First Timers' Reception

Sheraton Fallsview - Fallsview Studio ABC

If you are a "First Timer" to the CHLA Conference, please join us for a private reception.

Friday, Jun 10

05:00 PM - 06:00 PM

KumoSpace First Timers' Reception for Virtual Audience

Join here: <https://www.kumospace.com/chla-absc-2022>

For virtual participants

First Timer virtual attendees are welcomed to join us in our virtual First Timers' Reception here: <https://www.kumospace.com/chla-absc-2022>

Friday, Jun 10: Sheraton Fallsview - Fallsview Studio ABC

06:30 PM - 10:00 PM

Opening Reception

Sheraton Fallsview - Fallsview Studio ABC

Welcome to the CHLA 2022 Conference! Please join us for the welcome reception tonight where you may redeem the two (2) drink tickets provided to you (cash bar once your tickets are utilized) and some delicious hors d'oeuvres.

Friday, Jun 10

06:30 PM - 07:30 PM

KumoSpace Opening Reception for Virtual Audience

Join here: <https://www.kumospace.com/chla-absc-2022>

For virtual participants

All virtual attendees are welcomed to join our virtual Opening Reception here: <https://www.kumospace.com/chla-absc-2022>

Saturday, Jun 11: Sheraton Fallsview - Fallsview Studio AB

06:00 AM - 07:30 AM

CHLA YOGA

Sheraton Fallsview - Fallsview Studio AB

BYOM (bring your own mat) and join us for morning yoga!

Saturday, Jun 11

06:30 AM - 05:00 PM

Registration

Saturday, Jun 11: Sheraton Fallsview - Strategy Room 2

07:30 AM - 08:30 AM

Group Breakfast

Sheraton Fallsview - Strategy Room 2

Start the day off right! Enjoy a full hot buffet breakfast this morning and fuel your body before fueling your mind at today's sessions.

Saturday, Jun 11: Sheraton Fallsview - Great Room C

08:30 AM - 09:00 AM

Welcome & Opening Address

Sheraton Fallsview - Great Room C

Juanita Richardson
Manager, Michener Institute

Laura Banfield
McMaster University

Tara Landry
Head of reference and collection development, Université de Montréal

Tim Tripp
Director, Library & Information Services, University Health Network

Click here to view recording: <https://youtu.be/nJrDb3ffgXE>

Saturday, Jun 11: Sheraton Fallsview - Great Room C

09:00 AM - 10:15 AM

Opening Keynote - Dr. Bernice Downey

Sheraton Fallsview - Great Room C

Bernice Downey, RN, BScN, PhD

Associate Dean, Associate Professor, Indigenous Health | Faculty of Health Science, McMaster University

Click here to view recording: <https://youtu.be/nJrDb3ffgXE>

In this keynote presentation, Dr. Bernice Downey will utilize a socio-historical approach to the topic of Indigenous peoples followed by a discussion about the importance of knowledge stewardship and how librarians could be champions in both creating space for Indigenous knowledge material and how they can advocate and inform others. Resources: Structures of Indifference: <https://uofmpress.ca/books/detail/structures-of-indifference> Beyond 94 website: <https://newsinteractives.cbc.ca/longform-single/beyond-94?amp;cta=1Namwayut> - We are all one: <https://www.youtube.com/watch?v=2zuRQmwaREY>

Saturday, Jun 11: Sheraton Fallsview - Great Room AB

10:15 AM - 11:00 AM

Break in Exhibit Hall

Sheraton Fallsview - Great Room AB

Our sponsors and exhibitors are integral to the success of CHLA conferences. Their support allows us to bring you valuable conference programming at amazing venues in beautiful cities. Make sure you take the time to visit them frequently throughout the conference. VIRTUAL AUDIENCE NOTE: This is your opportunity to visit the virtual exhibit hall where you may visit virtual booth spaces, view information about your exhibitors, chat, and even "JOIN LIVE" to video-con with company reps in each virtual booth! Refreshments will be served. GAMIFICATION CODE: VISIT!

Saturday, Jun 11: Sheraton Fallsview - Strategy Room 3

11:00 AM - 12:00 PM

Concurrent Sessions 1A - Virtual Presentation Room

Sheraton Fallsview - Strategy Room 3

Cari Merkley

Janice Kung

Librarian (Health Sciences), University of Alberta

Jennifer Horton

Research Information Specialist, CADTH

Maren Goodman

Teaching & Learning Librarian, Western University

Marisa Tippet

Research & Scholarly Communication Librarian, Western Libraries

Megan Kennedy

Librarian (Health Sciences), University of Alberta

Saturday, Jun 11: Sheraton Fallsview - Strategy Room 3

11:00 AM - 11:20 AM

1A.1 - Literature Searching for Ethics Reviews: State of the Search

Co-Authors: Amanda Hodgson, Jennifer Horton, Melissa Walter

Sheraton Fallsview - Strategy Room 3

Paper Presentation

Jennifer Horton

Research Information Specialist, CADTH

Introduction: Systematic reviews with ethical analysis components are increasing in number, both as stand-alone reviews and as a component of health technology assessments. However, there is almost no guidance or information on how literature searches are performed for these reviews. We will analyze a large set of published systematic reviews with ethical analysis components in order to provide an overview of current literature searching practices in this field. Methods: As part of a larger project on literature searching methods for ethics reviews, we conducted a thorough search in six databases for a combination of the following three concepts: systematic reviews ...

Saturday, Jun 11: Sheraton Fallsview - Great Room C

11:00 AM - 12:00 PM

Concurrent Sessions 1B - Virtual Presentation Room

Sheraton Fallsview - Great Room C

Allison McArthur

Library Information Specialist, Public Health Ontario

Beata Pach

Manager, Library Services, Ontario Agency for Protection and Health Promotion (Public Health Ontario)

Saturday, Jun 11: Sheraton Fallsview - Great Room C

11:00 AM - 11:20 AM

1B.1 - Urgent, Important, and Due ASAP: Providing Public Health Library Services in a Global Pandemic

Co-Authors: Lindsay Harker, Domna Kapetanos, Allison McArthur, Susan Massarella, Beata Patch, Hannah Skinner

Sheraton Fallsview - Great Room C

Paper Presentation

Allison McArthur

Library Information Specialist, Public Health Ontario

Beata Pach

Manager, Library Services, Ontario Agency for Protection and Health Promotion (Public Health Ontario)

Domna Kapetanos

Library Information Specialist, Public Health Ontario

Introduction: Our library is situated within a provincial public health agency with a mandate to generate and share public health evidence and technical advice. The Library Services (LS) team is embedded in the process of developing knowledge products and plays an active role supporting the COVID-19 pandemic response. Description: Building on lessons learned from H1N1, LS began proactively disseminating information on COVID-19 even before the pandemic was officially declared, delivering daily summaries of peer-reviewed literature and preprints on COVID-19 to staff. A second daily scan of news and guidelines from public health organizations was also shared internally and on the ...

Saturday, Jun 11: Sheraton Fallsview - Strategy Room 3

11:20 AM - 11:40 AM

1A.2 - Case Study: Scale of Librarian Involvement in Systematic Review Publications at University of Alberta

Co-Authors: Megan Kennedy, Janice Kung

Sheraton Fallsview - Strategy Room 3

Paper Presentation

Janice Kung

Librarian (Health Sciences), University of Alberta

Megan Kennedy

Librarian (Health Sciences), University of Alberta

Introduction: It is well documented that librarian involvement in systematic reviews generally increases quality of reporting and the review overall. We aim to analyze the level of librarian involvement in systematic reviews conducted at University of Alberta. Methods: Using Web of Science (WoS), we searched for systematic reviews completed in the past five years with a UAlberta co-author. Systematic reviews identified through WoS will be screened in two phases: 1) Determining if the paper is a true systematic review publication (e.g. excluding duplicates, protocols, systematic review methodology papers, etc.), 2) Screening for librarian involvement (acknowledgement, co-author, or no involvement). Results: ...

Saturday, Jun 11: Sheraton Fallsview - Great Room C

11:20 AM - 11:40 AM

1B.2 - Information Seeking in the Time of COVID: How do Young Adults Find COVID-related Information?

Co-Authors: Joan C. Bartlett, Aaron Bowen-Ziecheck, Sofie Tsatas

Sheraton Fallsview - Great Room C

Paper Presentation

Joan Bartlett

Prof., McGill University

Introduction: Past research indicates that young adults rely heavily on information obtained from the web and social networks, but also that they may not be able to judge the authenticity, validity and reliability of the digital information, and may share misinformation among themselves. Our prior work found inconsistencies between the resources judged most credible for health information, and the resources used most frequently. Credible resources were reported to be inaccessible, with reliance instead on Internet (including social media) and personal sources. Librarians were not generally considered as "experts" with respect to health information. As part of this ongoing program of ...

Saturday, Jun 11: Sheraton Fallsview - Strategy Room 3

11:40 AM - 12:00 PM

1A.3 - From a Service to a Partnership: Reimagining and Redesigning Knowledge Synthesis Work in an Academic Research Setting

Co-Authors: Maren Goodman, Denise Horoky, Roxanne Isard, Alanna Marson, Christy Sich, Meagan Stanley, Marisa Tippet

Sheraton Fallsview - Strategy Room 3

Paper Presentation

Maren Goodman

Teaching & Learning Librarian, Western University

Marisa Tippet

Research & Scholarly Communication Librarian, Western Libraries

Introduction: The pandemic has led to a boom in the volume of requests from students for systematic and scoping review assistance as well as requests from faculty for librarians to participate on systematic and scoping review research teams. A team of librarians at our large, research-intensive university saw the increase in demand for librarian participation on research teams as an opportunity to launch Partner with a Librarian, a 1-year pilot which connects faculty researchers with librarians who partner as co-authors in the planning, execution, and writing of knowledge syntheses. Description: Our systematic and scoping review team launched Partner with a ...

Saturday, Jun 11: Sheraton Fallsview - Great Room C

11:40 AM - 12:00 PM

1B.3 - Impact and Attention of Open Access COVID research at Canadian Research-Intensive Universities

Co-Authors: Jeffrey Demaine, Shannon O'Reilly, Mike Taylor

Sheraton Fallsview - Great Room C

Paper Presentation

Jeffrey Demaine

Bibliometrics and Research Impact Librarian, McMaster University

Mike Taylor

Head of Data Insights, Digital Science

Abstract Using the research output from McMaster University, we compare the citation impact and broader online engagement of Open Access (OA) versus non-OA ("closed") articles relating to COVID-19. Introduction In response to the COVID-19 pandemic, many publishers waived Article-Processing Fees, resulting in a surge of OA publications. We characterize the growth of this research field through the lens of NIH research categories, comparing global trends with Canada's 15 research-intensive universities ("The U15"). We then look at how growth in OA publications corresponded to an increase in COVID research engagement. Methods A search was conducted using a structured search keyword/facet method ...

Saturday, Jun 11: Sheraton Fallsview - Great Room AB

12:00 PM - 01:15 PM

Lunch in Exhibit Hall

Sheraton Fallsview - Great Room AB

Hungry? Our exhibitors have plenty of products and services to fill you up ... and join us for a scrumptious hot buffet lunch with our exhibitors! VIRTUAL AUDIENCE NOTE: Don't be left out! Make this a lunch and learn opportunity ... visit the exhibit hall where you may visit 3D, online booth spaces, view information about your exhibitors, chat, and even "JOIN LIVE" to video-con with company reps in each virtual booth!

Saturday, Jun 11: Sheraton Fallsview - Great Room C

01:15 PM - 02:00 PM

Lightning Talks - Virtual Presentation Room

Sheraton Fallsview - Great Room C

Alanna Miller

Research Assistant, The National Collaborating Centre for Methods and Tools

Alexandre Amar-Zifkin

Librarian, McGill University Health Centre

Charlotte Beck

Guided Medline Exercise, University of British Columbia

Charmaine De Castro

Chidiebere Michael Iro

M.Sc., MSt, McGill University

Connie Winther

Head, Faculty Engagement (Health Sciences), University of Alberta

Heather Cunningham

Assistant Director, Research & Innovation Services, University of Toronto

Meredith Fischer

Liaison Librarian, Wilfrid Laurier University

Saturday, Jun 11: Sheraton Fallsview - Great Room C

01:15 PM - 01:45 PM

LT1 - Information Seeking Behavior of Early Career Family Physicians

Co-Author: Joan C. Bartlett, Chidiebere Michael Iro

Sheraton Fallsview - Great Room C

Lightning Talk

Chidiebere Michael Iro

M.Sc., MSt, McGill University

Introduction: Early career professionals experience transitions marked by changes in identities, roles, relationships, abilities and patterns of behavior. In addition to these, physicians at the beginning of their careers face the supplemental pressure of feeling that lives depend on the decisions they make at work, even as they navigate this transition. While residency offered immediate access to an experienced physician and free information resources, these are absent in established practice. Amongst family physicians, the most frequently arising information needs were questions related to diagnosis, treatment, and questions asked by patients. The most frequently consulted resources were colleagues, textbooks, journal or ...

Saturday, Jun 11: Sheraton Fallsview - Great Room C

01:15 PM - 01:45 PM

LT2 - "What a MeSH!" Improving Clinical Trial Retrieval and Record-handling from the Cochrane Library

Co-Authors: Alexandre Amar-Zifkin, Andrea Quaiattini

Sheraton Fallsview - Great Room C

Lightning Talk

Alexandre Amar-Zifkin

Librarian, McGill University Health Centre

You need to search MeSH along with textwords when you're searching Cochrane, even if you're searching Medline in parallel, otherwise you might miss stuff. We'll explain why. Also we will show you ONE WEIRD TRICK to get your citation manager to more completely ingest exports from Cochrane. It'll be fun (for certain values of fun).

Saturday, Jun 11: Sheraton Fallsview - Great Room C

01:15 PM - 01:45 PM

LT3 - Guided Medline (Ovid) Exercise

Co-Authors: Charlotte Beck, Kyle Gailing

Sheraton Fallsview - Great Room C

Lightning Talk

Charlotte Beck

Guided Medline Exercise, University of British Columbia

Introduction: Library instruction in the health sciences includes searching Medline (Ovid). Our in-person teaching is supplemented with a locally developed Medline tutorial available on you tube. With Covid 19 and exclusively doing remote teaching, we discovered that these tutorials provided insufficient guidance on using Medline (Ovid) to conduct a structured search. To fill this gap, we created The Guided Medline Exercise. Description: Using Libguides, we developed a learning object where each stage of the structured search is presented on its own page: Analysis of the research question with PICO; Flnding and using subject headings and keywords for each concept; Appropriate ...

Saturday, Jun 11: Sheraton Fallsview - Great Room C

01:15 PM - 01:45 PM

LT4 - Can Artificial Intelligence Learn to Identify Systematic Reviews on the Effectiveness of Public Health Interventions?

Co-Authors: Dr. Maureen Dobbins, Heather Husson, Alanna Miller, Kristen Read

Sheraton Fallsview - Great Room C

Lightning Talk

Alanna Miller

Research Assistant, The National Collaborating Centre for Methods and Tools

Background: Health Evidence™ aims to make it easier for public health decision-makers to use evidence in their practice. We provide access to over 7,700 critically appraised systematic reviews on the effectiveness of public health interventions. On average, over 13,000 records are screened each month for relevance to the registry. As the number of published reviews continues to grow each year, maintaining an up-to-date registry is increasingly resource intensive. Artificial intelligence (AI) may be one way to ensure maintenance of this registry continues to be feasible. Methods: The team uploaded a large training set (n=43,273) of records labelled as either relevant ...

Saturday, Jun 11: Sheraton Fallsview - Great Room C

01:15 PM - 01:45 PM

LT5 - Local Authorship on Inuit Primary Health Research Publications

Co-Authors: Sandy Campbell, Connie Winther

Sheraton Fallsview - Great Room C

Lightning Talk

Connie Winther

Head, Faculty Engagement (Health Sciences), University of Alberta

Background: Inclusion of local and community researchers as integral members of research teams and, ultimately, as authors on research publications is one of the ways in which we can build equity and inclusion into research projects in Canada's North. This project examines the primary studies related to the health of Canadian Inuit people, to identify the frequency, extent and methods of the inclusion of local community members as authors. Methods: A title search of Ovid MEDLINE for articles about Inuit retrieved 472 articles. Studies that refer to primarily Inuit in Greenland and Alaska were excluded, as were those that were ...

Saturday, Jun 11: Sheraton Fallsview - Great Room C

01:15 PM - 01:45 PM

LT6 - Celebrating Grey: Re-Developing an Author Recognition Program

Sheraton Fallsview - Great Room C

Lightning Talk

Meredith Fischer

Liaison Librarian, Wilfrid Laurier University

Introduction: Author recognition programs are successful annual events at many academic and health sciences libraries. They provide an opportunity to identify, honour, and promote faculty publications, highlight library collections, and engage with the research community. While discussions about research assessment in tenure and promotion processes increasingly acknowledge the need to look beyond peer-reviewed publications, author recognition programs still tend to focus on traditional output such as books and journal articles. Description: Celebrating Achievements is a new iteration of a popular author recognition program at Wilfrid Laurier University, and a collaboration between the Library and the Office of Research Services. It ...

Saturday, Jun 11: Sheraton Fallsview - Great Room C

01:15 PM - 01:45 PM

LT7 - Publishing for IMPACT: Publication Literacy Skills to Publish and not Perish

Co-Authors: Heather Cunningham, Graeme Slaght, Margaret Wall

Sheraton Fallsview - Great Room C

Lightning Talk

Heather Cunningham

Assistant Director, Research & Innovation Services, University of Toronto

Introduction: Early-career researchers often learn about publishing through trial and error where publication and copyright decisions are made at the end of the research process, and few academic departments offer any form of structured training. The library saw an opportunity to develop a comprehensive and sustainable approach to address the publication literacy skills gap. Description: A five module asynchronous Getting Published Challenge was created in 2019 on the concepts of researcher identity, peer review, journal selection, scholarly sharing, and research impact. Hundreds of students have taken the Getting Published Challenge to build a personal Publication Plan. These modules were re-purposed ...

Saturday, Jun 11: Sheraton Fallsview - Great Room AB

02:00 PM - 02:30 PM

2A.1 - The Right Tool, at the Right Time, for the Right Task: Information Management Platforms used During the COVID-19 Pandemic

Co-Authors: Jeff Maus, Kelly Sabaliauskas, Minakshi Sharma, Taiqi Ran, Jielan Xu, Sabrena Yang, Michael Young

Sheraton Fallsview - Strategy Room 3

Paper Presentation

Jeff Maus

Consultant, Information & Policy Management, Toronto Public Health, City of Toronto

Minakshi Sharma

Consultant, Information & Policy Management, Toronto Public Health

Introduction: During the pandemic, public health organizations required agile information systems. Keeping staff up to date, monitoring the health of the larger community and ensuring adherence to changing regulations required the use of nimble platforms while addressing concerns around access, privacy, and information security. Description: Information management was made possible by using LibGuides, intranet sites, online survey tools, Moodle, and email blasts. We will outline the features of each platform and its suitability to the required task. First, the LibGuides platform was used to collate early evidence that emerged on SARS-CoV-2 and offer the city a space to gather information ...

Archivist/Information Specialist, St. Michael's Hospital, Unity Health Toronto

Zack Osborne

Manager, Health Information & Knowledge Mobilization, Unity Health Toronto

Introduction: Posters are a popular format to present and share research. However, research output in poster formats in the biomedical and health sciences (e.g. in medical education, healthcare quality improvement initiatives, etc.) are commonly lost or forgotten because they are not preserved, catalogued, indexed, or discoverable in many storage and retrieval databases. This loss represents a significant waste of time, labour, resources, applied research, and new knowledge. Description: Identifying this gap, the Unity Health Toronto Library Services and Archives team undertook a project to establish a repository system to preserve, describe, and make accessible the valuable local research output by ...

Saturday, Jun 11: Sheraton Fallsview - Strategy Room 3

02:50 PM - 03:10 PM

Librarian, Wellington-Dufferin-Guelph Public Health

Experiences of Public Health Library Staff During the COVID-19 Pandemic: Stepping up to Support our Organizations and Reflecting on Lessons Learned Introduction: The Government of Ontario declared its first provincial emergency in response to COVID-19 in March 2020. All health organizations, especially public health units, were at the forefront of the pandemic response. Almost two years later, the public health professionals at Ontario's Public Health Units (PHUs) continue to adjust and adapt to the ever changing municipal, provincial, and federal guidelines, protocols, and orders. Public health information professionals supported the work of their respective PHUs in various ways. Description: Using ...

Co-Authors: Jill T. Boruff, Alisa B. Rod

Sheraton Fallsview - Great Room C

Paper Presentation

Alisa Rod

Research Data Management Specialist, McGill University

Jill Boruff

Liaison Librarian, McGill University

Introduction With the introduction of PRISMA-S, librarians need a way to archive and share detailed search histories that does not rely exclusively on journal publishers and allows librarians to remain in control of this important research output. By defining search strategies and related database exports as code/scripts and data, we can expand the mandate of the data management infrastructure to include this work. The objective of this project was to create a space in our institutional data repository for our librarians to deposit and share their search strategies for knowledge syntheses (KS). Description A health sciences librarian and the research ...

Saturday, Jun 11: Sheraton Fallsview - Strategy Room 3

03:10 PM - 03:30 PM

2A.3 - Mind the gaps: opportunities for Consumer Health provision by a Provincial Health Library System

Co-Authors: Morgan Truax, Marcus Vaska

Sheraton Fallsview - Strategy Room 3

Paper Presentation

Marcus Vaska

Librarian, Knowledge Resource Service, Alberta Health Services

Morgan Truax

Director, Knowledge Resource Service, Alberta Health Services

Introduction To inform the design of a consumer health strategy for a provincial health library system, the library sought to understand patient challenges and barriers in accessing quality sources of health information. Description Over a period of 3 months in the winter of 2020-2021, the library engaged in semi-structured interviews with relevant clinical and corporate stakeholders. Program leads were asked about their role in consumer health information provision and support, and where they saw gaps and opportunities within the organization. Answers were themed and analysed, and an internal report was produced to guide next steps in developing a consumer health ...

Library Technician, University Health Network

Introduction: In 2020, the Toronto Health Libraries Association conducted a member engagement survey to determine the primary role of the chapter in supporting the health and hospital library workers of the greater Toronto area. Responses indicated the need to advocate for and offer targeted professional development to library technicians. In spring 2021, the association put out a call for volunteers and the Library Technician SubCommittee (LTSC) was launched. Description: The LTSC is composed of five library technicians with a mandate to produce a professional development program annually. The inaugural event was held in fall 2021 with the objectives of highlighting ...

Zen Doodling with Joyce of Art

Join here: https://us02web.zoom.us/j/83875109038?pwd=kn0zYQy6DpJB4MnRgZJXxi2woVvpq_1

For virtual participants

Join us in our interactive Zoom meeting room here: https://us02web.zoom.us/j/83875109038?pwd=kn0zYQy6DpJB4MnRgZJXxi2woVvpq_1 Zen-Doodling is the art of drawing designs using simply structured patterns or 'tangles'. When you draw shapes and designs that don't seem to make much sense at first, you are creating art, but you're also creating a mood, focus, and state of mind. As such, you will also be disconnecting from a "mood" or a state-of-mind. We will concentrate on small blocks of lines and shapes that become patterns. The patterns become a sense of flow, which calms your mind and allows you to connect to a bit of inner quiet and ...

Sunday, Jun 12: Sheraton Fallsview - Great Room C

10:25 AM - 11:15 AM

LT8 - New Instructor onboarding program for Medical Library Technicians

Co-Authors: Jeanette Blanchard, Ashley Jane Leonard

Sheraton Fallsview - Great Room C

Lightning Talk

Ashley Jane Leonard

Librarian, Knowledge Resource Service, Alberta Health Services

Introduction Knowledge Resource Service (KRS) offers ten scheduled online information literacy courses. Until 2020, it was usual for these courses to be taught solely by librarians. Owing to staff shortages and Medical Library Technicians (MLT) expressing the desire to learn new skills, it was decided that MLTs would begin teaching two online courses. Five MLTs volunteered to take on instructional responsibilities. Description Research was carried out to see what best practice dictated for in-house staff training in this area. Following this, an onboarding plan was created. This plan consisted of a 3-stage process which included observation, co-teaching, and solo-teaching. It ...

Sunday, Jun 12: Sheraton Fallsview - Great Room C

10:25 AM - 11:15 AM

LT9 - Active Learning in Action: Incorporating Virtual Escape Rooms and Scavenger Hunts in Library One-Shot Sessions

Sheraton Fallsview - Great Room C

Lightning Talk

Julia Martyniuk

Liaison and Education Librarian, University of Toronto

Active learning is an important aspect in ensuring students' understanding and retention of instructional material. This presentation will review the successes and challenges of incorporating active learning opportunities in online one-shot instruction sessions, and focus on the role escape rooms and scavenger hunts play as an active learning technique. The case example of a specific one-shot library session, where medical graduate students searched for and accessed information and resources by way of a group escape room activity, will be highlighted. This presentation will underscore how escape rooms can be applied to orient students to academic libraries, thereby fostering engagement and ...

Sunday, Jun 12: Sheraton Fallsview - Great Room C

10:25 AM - 11:15 AM

LT10 - Searching Methods for rapid evidence reviews during Public Health Emergencies

Co-Authors: Emily Clark, Taylor Colangeli, Dr. Maureen Dobbins, Leah Hagerman, Dr. Sarah Neil-Sztramko

Sheraton Fallsview - Great Room C

Lightning Talk

Leah Hagerman

Research Coordinator, National Collaborating Centre for Methods and Tools

As COVID-19-related evidence surged early in the pandemic, numerous COVID-specific databases and registries with varying features and functions emerged. Our team established a Rapid Evidence Service to conduct rapid reviews to inform the public health COVID-19 response. Here, we outline our lessons learned in searching for evidence related to the COVID-19 pandemic and provide recommendations for researchers and database developers when responding to public health emergencies. We evaluated databases and registries used to inform our rapid reviews based on three domains: topics and specialties (i.e., infection prevention and control, disease characteristics, surveillance and epidemiology, equity, policy, and mental health and ...

Sunday, Jun 12: Sheraton Fallsview - Great Room C

10:25 AM - 11:15 AM

LT11 - Leveraging the Virtual Environment to offer Cross-Institutional Workshops on Knowledge Synthesis Methodologies

Co-Authors: K. Alix Hayden, Zahra Premji

Sheraton Fallsview - Great Room C

Lightning Talk

Zahra Premji

Health Research Librarian, University of Victoria

Introduction: Workshops teaching knowledge synthesis (KS) methodologies are in high demand. However, teaching the how-to aspects of KS methodologies can require significant time commitment (6-8 hours) and expertise. Furthermore, due to the combined conceptual and technical content in KS workshops, co-teaching approaches are essential to facilitate instruction, especially in the virtual environment. Online workshop offerings have become common at many academic libraries since the pandemic, which has led to new opportunities to collaborate across institutions. Description: Two librarians, each from an academic library in different provinces, came together to virtually co-teach a 3 workshop series on KS methodologies. The in-depth ...

Sunday, Jun 12: Sheraton Fallsview - Great Room C

10:25 AM - 11:15 AM

LT12 - Creating an Interdisciplinary Knowledge Synthesis Community of Practice at the University of Ottawa Library

Co-Authors: Karine Fournier, Lindsey Sikora

Sheraton Fallsview - Great Room C

Lightning Talk

Karine Fournier

Research Librarian, University of Ottawa

With the growing demand for knowledge synthesis services across disciplines at the University of Ottawa Library, a Knowledge Synthesis Community of Practice (CoP) for all interested library employees was formed in 2021. This CoP gathers monthly with organized discussion and timely presentations with ideas put forward by its members. This talk will highlight how this CoP came together, its objectives and Terms of Reference, and the evolution of the topics of discussion that have arisen in order to ensure that members of the CoP can increase their competencies of knowledge synthesis.

Sunday, Jun 12: Sheraton Fallsview - Great Room C

10:25 AM - 11:15 AM

LT13 - Introducing our Library Champions

Sheraton Fallsview - Great Room C

Lightning Talk

Chloe George

Senior Library Assistant, Gloucestershire Hospitals NHS Foundation Trust

An initial attempt by the Library at Gloucestershire Hospitals NHS Trust, England to launch a Library Champion project was thwarted by Covid-19. The project relaunched, registering champions in July 2020, adapting the original plan to ensure it would not be detrimental to patient care. Twenty Champions were identified, who signed a contract formalising their relationship with the library, receiving a Champions badge and quarterly update emails. Champions were drawn from different hospital settings (including Surgery, Critical Care, Infection Control, Dermatology, Estates and Quality Improvement) and roles (including nurses, doctors, physio, psychologist, health care assistant and managers). They committed to advocating ...

Sunday, Jun 12: Sheraton Fallsview - Great Room C

10:25 AM - 11:15 AM

LT14 - Instagram Stories @NOSMLibrary

Sheraton Fallsview - Great Room C

Lightning Talk

Alanna Campbell

Public Services Librarian, NOSM University

Introduction: The Health Sciences Library at NOSM University has been reaching members on Instagram since 2017 and it is one of the library's most popular platforms. With the ongoing pandemic, the library aimed to utilize Instagram to its full potential to increase interaction with learners, faculty and staff. The greatest concern was how time-consuming Instagram stories would be to produce. Description: With production time the initial primary concern, tools and resources readily available to the library were first assessed for their usefulness. Through trial and error over the course of the 2021-2022 academic year the Public Services Librarian and Library ...

Sunday, Jun 12: Sheraton Fallsview - Great Room C

10:25 AM - 11:15 AM

LT15 - 3D Printing in Health Sciences Faculties and Libraries

Co-Authors: Sandy Campbell, Liz Dennett, Laura Hamonic, Connie Winther

Sheraton Fallsview - Great Room C

Lightning Talk

Connie Winther

Head, Faculty Engagement (Health Sciences), University of Alberta

Introduction At the University of Alberta, we are currently in the planning stages for a new health sciences library. Three dimensional (3D) printing is a technology of interest for the new library, building upon the success of the current 3D printing services already existing at the University of Alberta Library. 3D printing is used in teaching across the University and we were interested in determining what unique needs health sciences faculties have for 3D printing, and the role that the library has in fulfilling those needs. Methods/Description An environmental scan is being completed to better understand the use of 3D ...

Paper Presentation

Jackie Phinney

Instruction/Liaison Librarian: Dalhousie Medicine New Brunswick, Dalhousie University

Kristy Hancock

Evidence Synthesis Coordinator, Maritime SPOR SUPPORT Unit

Introduction Continuing education (CE) is an expectation of many healthcare professionals and librarians to maintain credentials and keep their skills current. Since librarians have experience providing instruction, librarian provision of CE seems a natural fit. However, delivering content to healthcare professionals can be challenging due to time constraints, failed outreach, uncertainty surrounding topics, and more. Librarians may be wondering how they can provide helpful CE when they are unsure how to address these issues. Description Mindful of these challenges, we began a scoping review in February 2020 (search updated September 2021) to examine the literature on librarian instruction of CE ...

Abstract Introduction With the objective of continual improvement, CADTH Research Information Services has committed to revitalizing their shared searching tools Grey Matters, Strings Attached Search Filters, and the Peer Review of Electronic Search Strategies (PRESS) Checklist. Description Three CADTH tools: (1) Grey Matters checklist is a tool for finding health-related grey literature that is not commercially published. The checklist has been available online as a Word document for several years, both in English and French language. (2) CADTH creates pragmatically or systematically validated database search filters for use in evidence-based research, including those for retrieval of RCTs, systematic reviews, guidelines ...

3A.2 - Novel Coronavirus, Novel Ideas: Collaborative Creation of a Mandatory Information Literacy Module for First Year Health Sciences Students

Sheraton Fallsview - Strategy Room 3

Paper Presentation

Lydia Thorne

Health Sciences Librarian, Ontario Tech University

Introduction: As post-secondary institutions continue to offer more online and hybrid courses in response to the COVID-19 pandemic, addressing virtual learners' information literacy needs has become more important than ever before. When the university abruptly moved all classes online in March 2020, our team was able to quickly pivot and create a Canvas module to replace face-to-face instruction in a core undergraduate course. Description: All first year health sciences students are required to take a common subject, namely Information Literacy and Written Communication. Content for the module was developed in collaboration with instructors in order to meet course and assignment ...

Glyneva Bradley-Ridout

Education & Liaison Librarian, University of Toronto

Introduction In July 2021, we published a research study titled "UpToDate versus DynaMed: a cross-sectional study comparing the speed and accuracy of two point-of-care information tools", marking the end of a multi-year journey. A single publication belies the years of work that goes into planning and conducting a research project. In this presentation, we will share a "behind-the-scenes" glimpse into our experiences executing our research project, including our challenges, successes, and lessons learned. Description Health Sciences Libraries are often faced with difficult budget decisions regarding which clinical tools to purchase, while keeping in mind user preferences and needs. Our research ...

Chloe Pacht

Supervisor, Communicable Disease Liaison Unit, Toronto Public Health

Minakshi Sharma

Consultant, Information & Policy Management, Toronto Public Health

Introduction: The COVID-19 pandemic compelled public health organizations to undergo significant transformation and rethink key elements of their business processes. Remote work meant heavier reliance on technical skills and information management (IM) platforms to support COVID-19 Community Case and Contact Management (CC&CM), Mass Immunization Clinics (MICs) or Lab Liaison (LL) work. Description: Toronto Public Health (TPH) Library Staff engaged in three IM initiatives. First, library staff collaborated with Web Services Staff and Knowledge Translation (KT) Leads to design, develop and maintain the CC&CM Intranet Site with real-time updates communicating changes to processes, FAQs, workflows, 'How To' documents and guidelines. Next, ...

3B.3 - What Can be Learned from Failure? A Project on Predatory Journals

Co-Authors: Amanda Ross-White, Dr. Rosemary Wilson

Sheraton Fallsview - Great Room C

Paper Presentation

Amanda Ross-White

Health Sciences Librarian, Nursing, Queen's University

Introduction Predatory journals, with low standards of publication, mean flawed or fraudulent research can compromise future research. Often called 'predatory' or 'deceptive' publishers, both these terms have an implication that the editors and publishers behind them have a motivation to deceive or con authors. However, the motivations remain an assumption because little is known about the individuals behind these journals. This research intended to use qualitative, in-depth interviews to find out more about the individuals behind predatory journals. By engaging with them directly, we hoped to gain an understanding of how they see themselves in the publishing landscape, what value ...

Sheraton Fallsview - Great Room C

Paper Presentation

Jackie Phinney

Instruction/Liaison Librarian: Dalhousie Medicine New Brunswick, Dalhousie University

Introduction Since 2013, undergraduate medical (UGME) students at Dalhousie University's distributed medical program have participated in the Research in Medicine (RIM) program, requiring all students to complete research projects supervised by mentors. Library support for RIM has been present from its inception, most notably in the form of a yearly tutorial session on literature searching skills delivered to all first-year students across campuses, supplemented by an online asynchronous module and librarian consultations on demand. Description The tutorial traditionally took place using the in-person model, but with the onset of the COVID-19 pandemic, the session shifted to online, synchronous delivery. Although ...

Co-Authors: T. Derek Halling, Catherine Pepper

Sheraton Fallsview - Great Room C

Paper Presentation

Cathy Pepper, MLIS, MPH

Associate Professor/Regional Services Coordinator, Texas A&M University, Medical Sciences Library

Introduction. This paper reports on results of a survey regarding librarians' training needs for instruction. While instruction is a competency recognized by national library associations and is a job requirement for many public services librarians, little opportunity for training in pedagogy exists in formal training venues, such as library school, resulting in librarians learning how to teach on their own. The research questions are: How do librarians learn to teach? What specific pedagogical skills do librarians need? What recommendations could lead to improved access to pedagogical training and to increased competency in instruction for librarians? Method. A 12-item survey on ...

Co-Authors: Melanie Anderson, Caleb Nault, Raluca Serban

Sheraton Fallsview - Great Room C

Paper Presentation

Caleb Nault

Library Technician, University Health Network

Raluca Serban

Library Technician, University Health Network

Abstract Introduction Hospital health sciences libraries offer many in-person, single session workshops on topics ranging from database search skills to evidence based medicine to knowledge synthesis methods. These workshops need to compete with the extremely busy schedules of health professionals, students, administrative staff, and others. With many hospitals mandating staff work from home during the pandemic, it became imperative to engage our users virtually. We aimed to discover the practices that other hospital libraries developed around online instruction and launched a Quality Improvement project to inform and improve our own instruction practices. Methods The Quality Improvement research methods used included ...

4B.4 - Opening the black box of Librarian instruction in Knowledge Synthesis Methods: Using Sociomaterial Theory to explore online teaching

Sheraton Fallsview - Great Room C

Paper Presentation

Robin Parker

Evidence Synthesis & Information Services Librarian, Dalhousie University

Introduction: In addition to directly contributing search expertise to support knowledge synthesis (KS) teams, academic health librarians play significant roles training learners who are working on research reviews as part of their program or course work. While the skills development provided by librarians often centres around comprehensive searching, librarian expertise in KS methods more generally also benefits novice reviewers seeking assistance early in their research process. With the remote work and learning conditions brought by the COVID-19 pandemic much of this librarian instruction is conducted virtually, both to groups and individuals. A sociomaterial lens can illuminate the interconnected assemblages of ...
